

More Lab Space. More Lab Services.

Enthalpy Now Offers Ignition Propensity Testing

Durham, North Carolina – Enthalpy Analytical, Inc. announces the expansion into a second laboratory space. With the additional 6,000 ft² of laboratory space located five miles from our primary laboratory — both in Durham, NC — Enthalpy has brought on many new A2LA ISO 17025 accredited analyses including ignition propensity testing in accordance with ASTM Method E2187-09, *Standard Test Method for Measuring Ignition Strength of Cigarettes*.

Communication, Speed, and Service is Enthalpy's approach to all service offerings. With a newly updated 400 ft² Ignition Propensity laboratory space we are able to dedicate the resources allowing an average turnaround of 5 business days from receipt. Competitive pricing and discounts are offered for advanced scheduling and projects consisting of more than 10 SKUs.

OTHER SERVICES OFFERED:

- FDA Smoke & Smokeless HPHC Testing
- Electronic Aerosol & Device Testing
- TNCO
- Substantial Equivalents Testing
